Magento 2 Export CMS Pages and Blocks extension.

NodeSolutions is a company or entity that offers a free extension for Magento 2, a popular e-commerce platform. This extension is designed to enhance the functionality of Magento 2 by specifically focusing on the export of CMS (Content Management System) pages and blocks.

Magento 2 is a widely used e-commerce platform that allows businesses to create and manage online stores. Within Magento, CMS pages and blocks are crucial for designing and customizing the content and layout of web pages. These pages and blocks can contain various types of content, including text, images, and videos, and play a significant role in the overall appearance and user experience of an online store.

The "Magento 2 Export CMS Pages and Blocks" extension provided by NodeSolutions is intended to simplify exporting these CMS pages and blocks from a Magento 2 installation.

Features: -

- **Button for Export:** This feature adds a button within the CMS pages and blocks a section of the Magento 2 admin interface. When users access a CMS page or block within the admin panel, they will see this button as part of the user interface.
- **Exporting in CSV Format:** Clicking the "Export" button initiates the export process. It is configured to export all CMS pages and blocks in CSV (Comma-Separated

Values) format. CSV is a popular file format for storing tabular data, making it easy to open and edit in spreadsheet software such as Microsoft Excel or Google Sheets.

→ **Exporting Disabled CMS Pages and Blocks:** This extension allows users to export not only active CMS pages and blocks but also those that have been disabled. This feature ensures that even content that is not currently displayed or enabled within the Magento 2 store can be included in the CSV export. This can be particularly useful for keeping a comprehensive backup of all content, even if it's not currently in use or if there's a need to archive disabled pages and blocks for future reference or reactivation.

Such an extension can be valuable for Magento 2 store owners and administrators who must manage and migrate their CMS content efficiently. Simplifying the export process saves time and ensures that valuable content is easily preserved and utilized as needed.

In summary, the NodeSolutions free extension for Magento 2, titled "Magento 2 Export CMS Pages and Blocks," is a tool that simplifies the export of CMS pages and blocks within the platform, making it a convenient solution for users seeking efficient content management in their e-commerce endeavors.

To export CMS pages, log in to your admin account and navigate to Content > Pages within the Element section.

You can find the "Export Pages" button located before the "Add New Page" button. By clicking on it, you can export all CMS pages to a CSV file.
